yolov5 口罩识别训练数据 集

一 数据集下载

https://pan.baidu.com/s/1ZJbzf5qF9GKEqyo0RskWiQ

密码: 53hn

红框框出来的解压后分 train 和 val 两个目录,是 voco 格式的数据集,标注在 xml 里可以选择用 voc2coco 转换成 coco ,再通过脚本 coco_to_yolov5.py 再转一下。

https://github.com/shiyemin/voc2coco

二转换后的标注数据集

data_facemask_yolov5.tar.gz

解压 之后 目录结构 如下:

```
dataset.yaml
images
train
readme_put_your_train_jpg_here
val
readme_put_your_train_jpg_here
labels
train
train
train
test_00002995.txt
$\text{\text}$ $\text{\text{\text}}$ $\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\te
```

把网上下载的 口罩数据集 train 和 val 数据解压 到 images/train, images/val 即可

三 yolov5 使用训练集

下载 yolov5 及 yolov5s.pt

https://github.com/ultralytics/yolov5

下载后进入 yolov5 目录,新建 data/facemask.yaml 内容如下:

```
# download url ===

#

train: /home/hugo/data/data_facemask_yolov5/images/train/
val: /home/hugo/data/data_facemask_yolov5/images/val/

nc: 2

names: ['face', 'face_mask']
```

训练:

python3 train.py --workers 24 --batch 16 --epochs 30 --data facemask.yaml --cfg yolov5s.yaml --weights weights/yolov5s.pt
